### Propositional Logic

• A statement that is either true or false 2 + 3 = 5

• A statement that is either true or false 2 + 3 = 5: true

• A statement that is either true or false 1 + 1 = 3

• A statement that is either true or false 1 + 1 = 3: false

A statement that is either true or false
 Dhaka is the capital of Bangladesh

A statement that is either true or false
 Dhaka is the capital of Bangladesh: true

A statement that is either true or false
 Chittagong is the capital of Bangladesh:
 false

A statement that is either true or false
 Give me an A

A statement that is either true or false
 Give me an A
 Neither true or false
 Not a proposition

A statement that is either true or false
 Would there be a third world war?
 Neither true or false
 Not a proposition

All humans are mortal and 2 + 3 = 5

All humans are mortal and 2 + 3 = 5: Hard to depict whether true / false

All humans are mortal and 2 + 3 = 5

All humans are mortal: true and

2 + 3 = 5: true

All humans are mortal: true

and

2 + 3/=5: true

Logical connector

#### Propositional Variable

All humans are mortal

#### Propositional Variable

All humans are mortal: p

p can either be true / false

#### Propositional Variable

All humans are mortal and 2 + 3 = 5

#### Propositional Equivalences

## Tautology

$$[\neg p \land (p \lor q)] \rightarrow q$$

р	P		$[\neg p \land (p \lor q)] \to q$
0	0		1
0	1		1
1	0		1
1	1		1

### Contradiction

$$\neg([\neg p \land (p \lor q)] \to q)$$

р	Р		$\neg([\neg p \land (p \lor q)] \to q)$
0	0		0
0	1		0
1	0		0
1	1		0

## Contingency

 $p \rightarrow q$ 

р	P	$p \rightarrow q$
0	0	1
0	1	1
1	0	0
1	1	1

## Logical Equivalences

The compound propositions p and q are called *logically equivalent* if  $p \leftrightarrow q$  is a tautology.

Notation: ≡

### Logical Equivalences

Compound propositions that have the same truth values in all possible cases are called logically equivalent

Prove that:  $p \lor (q \land r) \equiv (p \lor q) \land (p \lor r)$ 

#### Truth table of $p \lor (q \land r)$

р	q	r	(q ∧ r)	p∨(q∧r)
0	0	0	0	0
0	0	1	0	0
0	1	0	0	0
0	1	1	1	1
1	0	0	0	1
1	0	1	0	1
1	1	0	0	1
1	1	1	1	1

Truth table of  $(p \lor q) \land (p \lor r)$ 

р	q	r	(p ∨ q)	(p∨r)	(p ∨ q) ∧ (p ∨ r)
0	0	0	0	0	0
0	0	1	0	1	0
0	1	0	1	0	0
0	1	1	1	1	1
1	0	0	1	1	1
1	0	1	1	1	1
1	1	0	1	1	1
1	1	1	1	1	1

Prove that:  $p \lor (q \land r) \equiv (p \lor q) \land (p \lor r)$ 

p ∨ (q ∧ r)	(p∨q)∧(p∨ r)
0	0
0	0
0	0
1	1
1	1
1	1
1	1
1	1

Prove that:  $(p \rightarrow q) \land (p \rightarrow r) \equiv p \rightarrow (q \land r)$ 

#### Logical Equivalences

$$p \rightarrow q \equiv \neg p \lor q$$
$$p \leftrightarrow q \equiv (p \rightarrow q) \land (q \rightarrow p)$$
$$p \oplus q \equiv (p \lor q) \land (\neg p \lor \neg q)$$

if Aang is not in the path of totality during the solar eclipse, Aang won't defeat the firelord.

- a: Aang is in the path of totality
- b: Aang will defeat the firelord.

$$\neg a \rightarrow \neg b$$

if you are a computer science major or you are not a freshman, you can access the Internet from campus

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

a 
$$V \neg b \rightarrow c$$

you can access the Internet from campus if you are a computer science major or you are not a freshman,

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

a 
$$V \neg b \rightarrow c$$

you can access the Internet from campus only if you are a computer science major or you are not a freshman,

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

$$c \rightarrow a V \neg b$$

you can access the Internet from campus only if you are a computer science major but you are not a freshman,

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

$$a \land \neg b \rightarrow c$$

you can access the Internet from campus iff you are a computer science major but you are not a freshman,

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

$$a \land \neg b \leftrightarrow c$$

you can access the Internet from campus if and only if you are a computer science major but you are not a freshman,

- a: you are a computer science major
- b: you are a freshman
- C: you can access the Internet from campus

$$a \land \neg b \leftrightarrow c$$

# Negation of propositional logic

#### De Morgan's Las

$$\neg(p \lor q) \equiv \neg p \land \neg q$$
$$\neg(p \land q) \equiv \neg p \lor \neg q$$

## Negating propositions

Find the negation of  $(p \lor (\neg p \land q))$ 

```
\neg (p \lor (\neg p \land q))
\equiv \neg p \land \neg (\neg p \land q)
\equiv \neg p \land (\neg (\neg p) \lor \neg q))
\equiv \neg p \land (p \lor \neg q)
```

## Negating propositions

Find the negation of  $p \leftrightarrow q$ 

$$\neg (p \leftrightarrow q)$$

$$\equiv \neg (p \rightarrow q \land (q \rightarrow p))$$
